

This year's ATS International Conference had a prominent booth by Insmed which highlighted NTM lung disease.

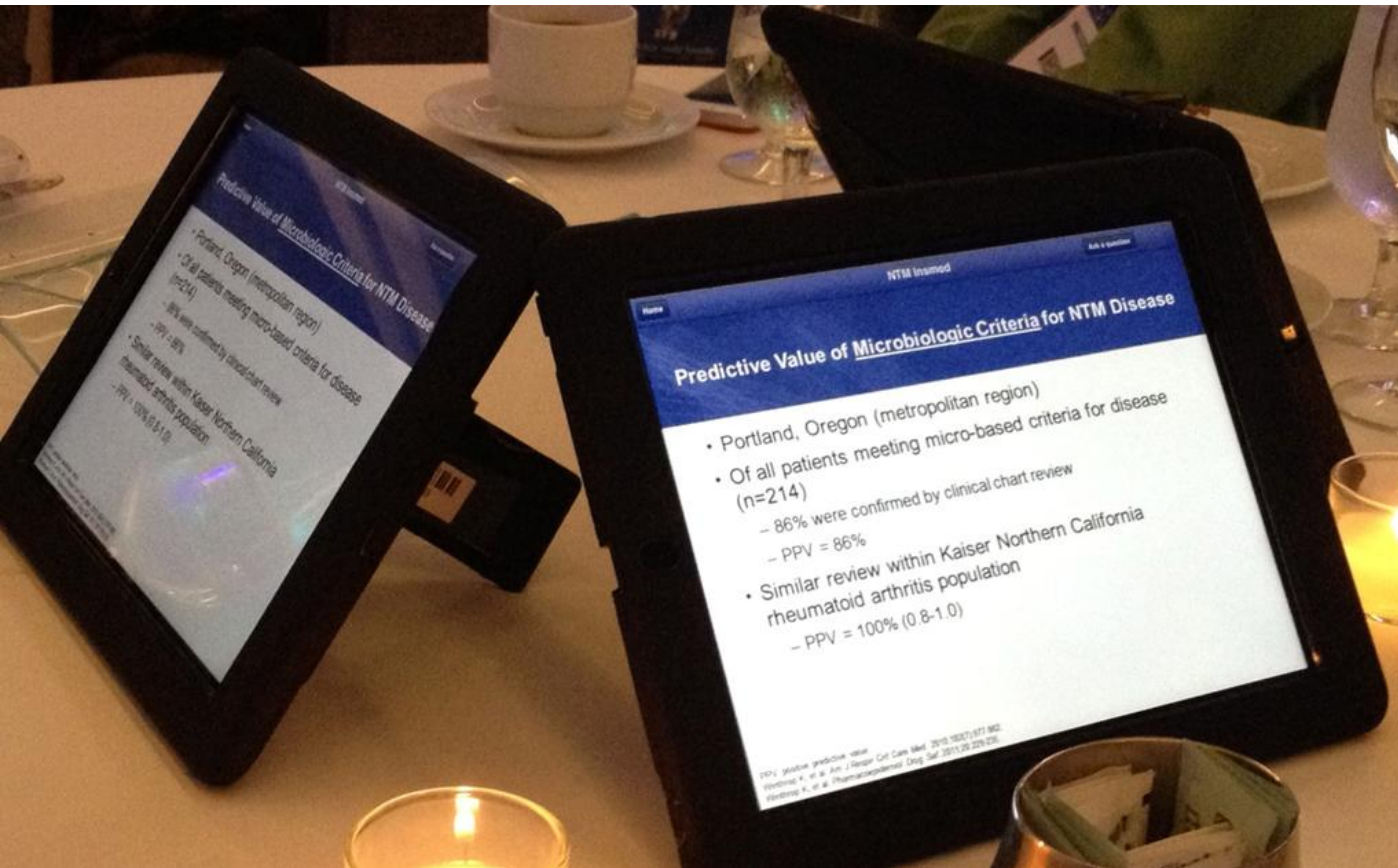

InMed's attention-grabbing booth in the ATS Exhibition Hall featured an informative video on NTM lung disease.

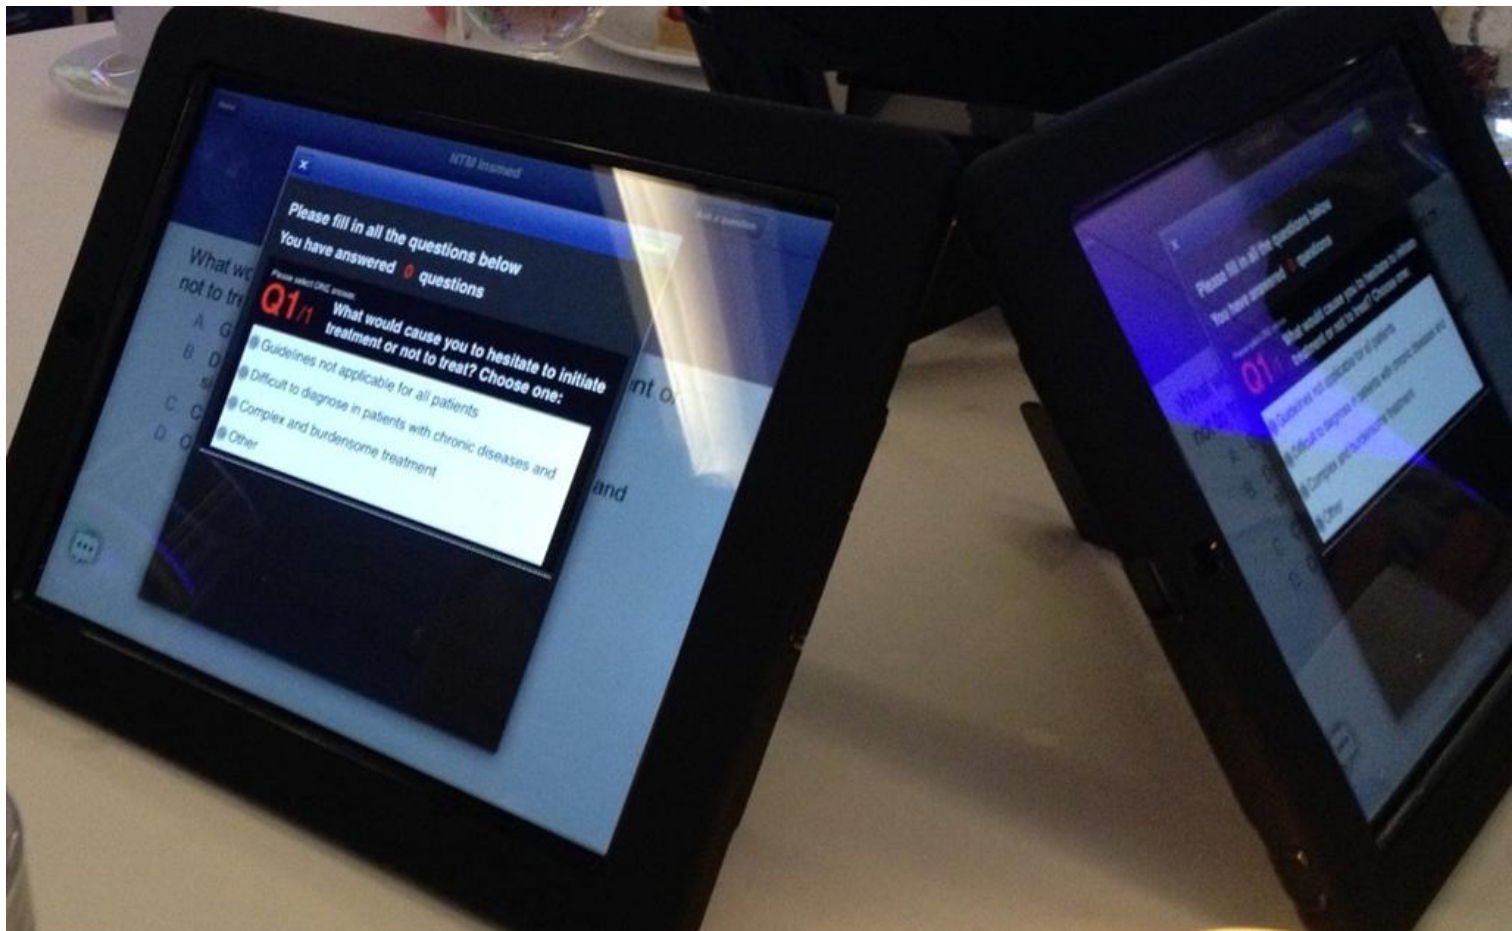

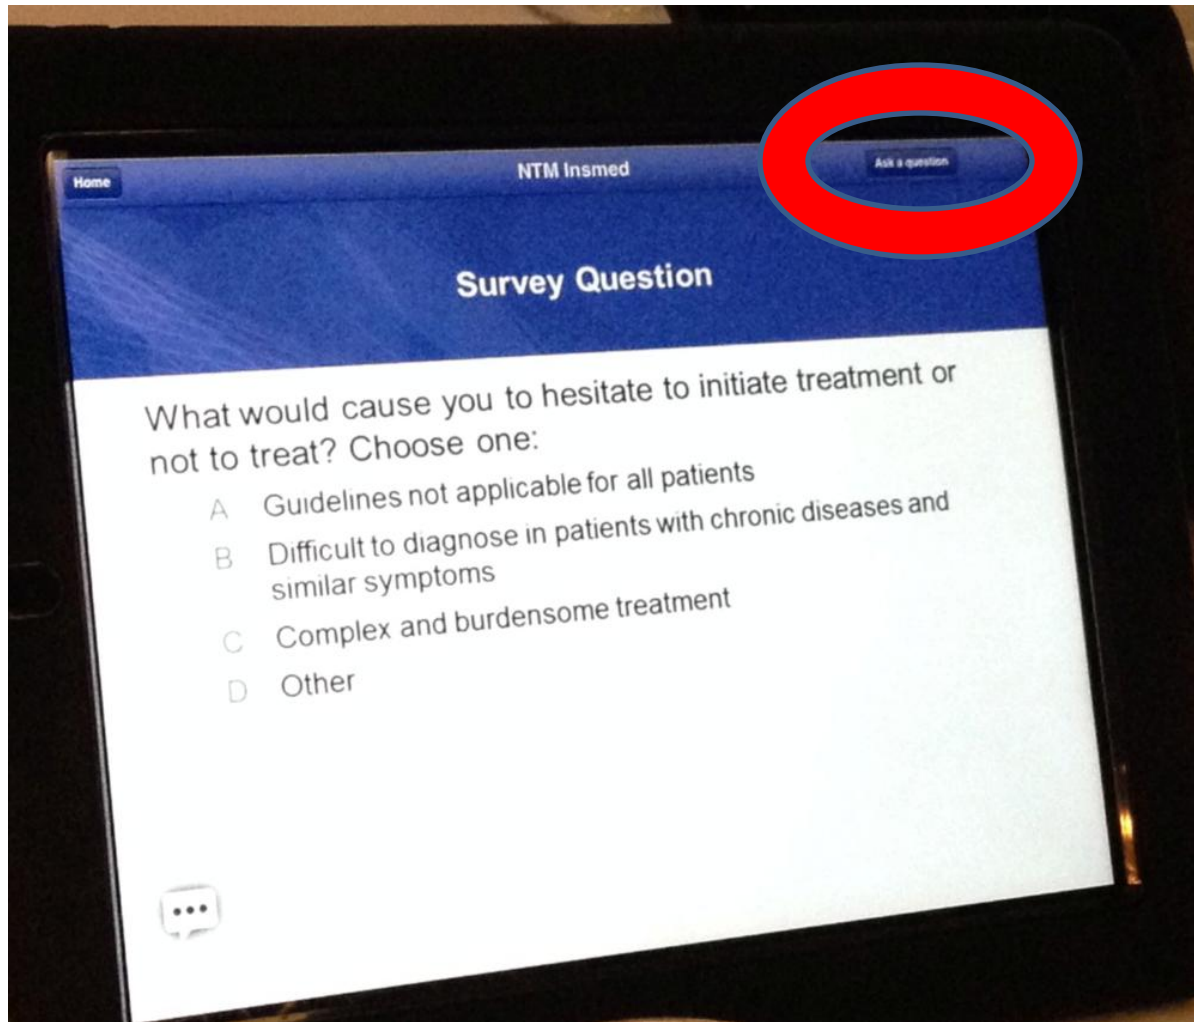

The Insmed-sponsored symposium titled “NTM Isn’t Waiting, Neither Should You,” attracted more than 300 attendees.

The symposium featured an interactive, learning-based format.

iPads set up at each table allowed symposium faculty to pose questions to the attendees, with answers tabulated and displayed in real time.

The interactive format also allowed audience members to ask questions of the faculty, enhancing the learning experience.
